#### WORMS

Not fishing worms, but worms which live inside of people and eat as much as is required by the person with them. The warmer part of the U. S. perhaps has more worms per person and more worms infesting persons than any other area. That dosen't mean that everyone in the South has worms, but it does mean that everyone in the South is liable to have them.

Everyday we see wormy peorle and we recognize them, (the more severe cases readily. They have as extremely sallow or muddy complexion, the skin is wrinkled, making them look older than they really are. They are very easily tired, are sluggish and lazy. Appetite is not very good but they usually eat, a lot. The most prevelent of these worms is the Hookworm-a worm about an inch in length and about the diameter of the lead of a lead pencil, tapering toward both ends and whitish in colar. They can often be seen When passed in the stool. Positive diagnosis is made by finding tho eggs of the worms in a stool specimen by the aid of a microscope. It derives its mame from the fact that it has several sharp hooks in its mouth by which it becomes at-Eached to the lining of the gut,. attached thus to the gut, it takes up blood and digested food, depriving the body of such and gencrally running down the system.

## COMPANY NEWS

For the purpose of discussing problems that Camp Educational Advisors have and to plan programs for the future a meeting was held by the 2nd. Sub-District Educational Advisors at Company 1439, Vilas, Fla. on Friday, March 15.

Captain Arther C. Van Saun, Chaplain, 2nd Sub-District conducted this meeting and attending were Captaing Henry G. Legarde,

# COMP.NY NEWS (Cont'd from Page 1 Col.2)

Lt. Barret, Commanding Officer, Co. 1410, Shady Grove, S. C. Bell, Cea, Co. 1410, Shady Grove, Stoney A. Hartin, Cea, Co.s 295 and 298, Sumatra and Wilma, O. W. Anderson, Cea, Co. 2401, Telogia and J. B. Johnson, Cea, Co. 1439, Vilas.

To conclude this meeting all the company assembled in t.c recreation hall for an evening of entertainment by singing, showing of slides and short talks. Music was given by two of the members of Co. 1439 Brown and Leatherwood, singing by the whole compony, introof the officers and Cea's of other companies, songs by Mrs. Stecher, demonstration of handwork by Mr. Johnson, Irish Love Songs by Mrs. Stecher and the whole company, tap dancing and contortionist by Ollie Kennedy and Paul Cooper and the showing of slides-Building of a Motor. Captain Stecher gave a short address to the company and all visiting officers and CEA gave a short talk. Our new Lt., Lt. Frederic also gave a short talk and said how glad he was to be with us. All introductions were made by Chaplain Van Saun. A good time was had by all.

Lt. Alvin A. Benin left last
Tuesday March 12 for his home near
New Orleans La. We regret losing
Him but he had stayed his enlistment and had to go. Lt. E. H. Frederic from Miss. City, Miss. has taken
his place and we hope that he will
wontinue the good work.

Captain Fred L. Koosa paid the Company a short visit last Friday March 15.

Col. Munson and Major Lewis paid the Company a short visit March 7.

We now have two new libraries. The two tegether consist of 130 books. One of these was obtained from the state library in Tallahassee and the other for Tarlahassee and the

## COMPANY NEWS (Cent'd from Page 1 Col.1)

Mrs. Stocher, Captain Stochers sister and brother-in-law, Mr. and Mrs. Walldocker have been visiting Captain Stocher for the past few days.

Eleven new baseball gloves have arrived and new practice and get into full swing. We hope to have as good or better team than we had last year.

Captain Koosa and Chaplain
Van Saun were in camp March 17, 18,
and 19.

EMERGENCY CONSERVATION WORK Office of the Director, Washington, D. C.

Civilian Conservation Corps
men working in national parks have
aided greatly in preserving wild life
within those areas, National Park
Service officials today advised
Robert Fechner, Director of Emergency Conservation Work. Stricter
enforcement of the "no hunting"
regulations within the parks and
monuments, and projects to protect
and increase rare and desirable
species of wild life have been
made possible through the work of
Civilian Conservation Corps enroll
ces.

In the Petrified National Monument, Arizona, approximately forty square miles have been fenced off to permit range revegetation and to provide a sanctuary for the native antelops of the region.

Similar antelepe and deer sancturaries are being completed in Grant Canyon National Monument, Bandlier National Monument, Zion National Park and Bryce Canyon National Park. In a number of these projects, the construction of drift fences has been necessary to exclude domestic cattle from a large portion of the parks in order to give the mattive autologe and deer

12 CV.

# EMERGENCY CONSERVATION WORK (Cont'd from page 2 Col. 2)

the full benefit of the available range. The protection of the Trumpeter swan, formerly plentiful in the Great Plains region of the United States, has been almost annihilated by hunters. It is estimated that scarcely fifty of these birds survive in the U.S. Today. To protect this rere species, Civilian Conservation Corps enrollees are constructing experimental nesting islands in some of the Yellowstone lakes. Active protective measures within Yellowstone National Park are also being carried out for the Sandhill crane, white pelican, : Canada goose, California gull and . the Great Blue heron.

Eradication of weed pests, such as fextail, injurious to native g grazing animals and wild species has been carried on extensively in Yellowstone, and in Rocky Mountain National Park, Colorado. Numerous waterfioles for game have been constructed in various park areas, located in the arid southwest.

Slaughter of deer living near the western boundry of Yosemite National Park has been greatly reduced by the construction of a look—ou tower in that area. Hunters, who have often come over the boundary lines of the park, unarmed, to drive the deer out of the park into the unprotected areas where they might le #gally be shot, have largely abandoned these raids now that the area is under constant observation by a ranger stationed in a Civilian Chnservation Corps built lookout tower.

"The policy underlying the Civilian Coaser ration Corps wild life
work, under the supervision of the
National Park Service, is based on
the belinf that the wild life of
America exists in the consciousness
of the people as a necessary part
of their national heritage," says
Arno B. Cammurer, Director, National
Park Service.

In the past, we have seen a wholerale dampate to of mild life

## EMERGENCY CONSERVATION WORK (Cont'd from Col.)

in nearly every part of the U. S. outside of the National Parks and Monuments. This situation proctically decimated many of our animals and birds. It is admitted generally that most visitors to National Parks and Monuments frequents these areas not only for the scenic and natural features but also to study the animals and birds."

"The perpatuation of primitive wild life requires more than mere protection because protection eliminated only hunting, trappin and wandalism, while many other detrimental influences are at work."

"The wild life technicians work on a carefully thought-out plan designed to maintain all possible primitive elements and to exolve the means of restrating species which have been forced from their matural status. Adjustments will be made for the wild life which can only be perpetuated under semi-artificial conditions. In carrying on this work, a splendid record of achievements has been turned in by the Civilian Conservation Corps enrolles."

# KNOWLEDGE IS POWER Ans. to last weeks ten questions:

- 1. Five inches is satisfactory for service and comfort.
- 2. Colds are so prevalent that they average a loss of ten days' activity to each individual yearly.
- 3. The number is countless,
- 4. The flora chan reases of Scuthern Europe combined with our own will produce the brunette as the reigning beauty of the future.
- 5. It has six.

C. India : 18 0 0 m mor ning in-

# KNOWLEDGE IS POWER (Cont'd from page 3 Col. 1)

- 7. New York State ranks first of all the States in Manufacturing.
- 8. All steel is made from iron ore.
- 9. The largest recorded piece of gold ever found was a nugget walled the Welcome Nugget weighing 2195 trow ounces.
- 10. The first to have the coinage system were the Lydians about the 6th century B. C.

Below are ten questions-See how many you can answer. Ans. will appear in the next issue of this paper.

- 1. Does the Marine Corps train men for its band?
- 2. What city publishes the most daily news papers?

THE ADVENTURES OF LIVING WITH OTHERS

By Arthur C. Van Saun, Ph.D.

Captain Chaplain 925th CA.

For two years the Civilian Conservation Corps has offered a nation wide experiment in living with others. This new admixture of youth includes everything from a change of coast to coast, to jumbling of climate. In this Federal Forest we have eight nationalities. In one Camp forty—three percent are from foreign born parents.

Such an adventure calls for adjustments. Social strains are inevitable. But youth is here to conquest and to conquer. The CCC boys come here from a background of defeat. They have profited by that experience. Their one goal, here is a noble conquering.

The present season offers an expanse of victory. Lent has always meant victory to many. It is a season of remembrance. To remember well is to repent. To repent is to remember well. And having remembered defeats, the victories in the offingingre more sweet. Then in this season of remembrance we are resolved on one certain pursuit,—that of human kindness, courtesy, fair play. This is our CCC privilege,—our ADVENTURE OF LIVING WITH OTHERS.

POEM
TH. NKING YOU
by Zac McGuff
Co. 1439

------

There beneath my pillow, it lies But not until my peering eyes

Have read a chapter through I linger on every verse and line, And drink of the cup, not filled with wine.

But the drinkkof love"Be True".

There wasn't once a good book there And the word of God was heard no-where

Except on certain days. (Cont'd next page Col. 1)

# NEWS FROM HERE AND YONDER Cont'd from page Cil. 2

coal miners in Russia.

Today Japan rules over a larger number of individuals than the U-nited States. Through the "warless" war that has carried on in Manchuria, Mongolia and China proper during the past two years, this small country has added 2,000,000 square miles and 100,000,000,people to its impire, an accession that is equiva##nt lent to 66 per cent of the area and 80 per cent of the population of the United States.

### SUNNY SPOTS

H. T.-Hey Buddy lend me fifty cents Goat P. what do you want with it? H.T.-To ger a pint of T.T.T.

Snake-Mr. are the girls in? Man-What girls? Snake-Pardon me I'm at the wrong house.

Kelloy-Does Mellie live here? Lady-Mo Mrs. R. Shaw lives here.

Kelley-Does Nellie live here? Lody-No Mrs. R. Shaw Jr. lives here. Kelley-Forget it good lady for get it.

Firemen! Fireman! Save my child

Simile N.-Baby dance with your uncle.
Girl-Sure.

Liver-lip Joe Jones-what are men after all?
Lima Bean Complexion G. Smith-After all women.

On a recent trip tooAlabama Plott and Day thrilled the crowd on the bus with a few steps of the Carioco.

Jos Jones. (Teasing) George let's go hollywood.
Smith. (Sullingly)Coming back soon from woodpile with a whoelbarrow Cont'd next Col.

## Cont SUNNY SPOTS Cont d from Col. 1

of wood and said, "its your turn next".

Formby-I8m in favor of a rough house Red R. I second the Commotion.

### SPORT GR..PHS

Babe Ruth now belongs to the Boston Nationals. He will play and also act as assistant manager.

Jerone and Paul Dean are featured in a new movie short produced by marner Bros. under the title of, "Dizzy and Daffy".

Did you know that....Babe Ruth does not own a straw hat.

Rich clubs turned down Curt Dabis because he was "to old"...
Twenty-nine.

----\*

Eleven new gloves have been received and practice will be held every afternoon. Everyone that is interested come out and try for the team. ..e have a game with Brinson Ga. here Saturday and Sunday.

Red Maxwell has taken Stuckeys place as the first to enter the moss hall and the last to leave.

### FACTS

They can conquer who believe they can.

You cannot build a reputation on things you are going to do.

Everyone is the architect of his own fortune.

No one is to poor to enrich the lives odf of others.

Dependability is the real key to success.

Make CCC jobs safe.

## THANKING YOU Cont'd from page 'Col. 2

There, now, lies a book. All Gods creations.
Thanks, American Bible Association.
Its there to stay always.

It teaches us the word of him He, who envaded the world so grim

To teach us right from wrong He strove and taught both night and day Attempting to drive all sins away.

Lots carry on the song.

It is most treasured of my treasures, rare which will forever be under coreful care

To help overcome lifes boulders. And I'm sure all the CC men Will asy, after reading from beginning to end

Onward C.ristian Soldiers.

\_\_\_\_\*\_\_\_

### PINE KNOTS .

You have often heard of people going Hollywood. Arnis Day is no exception he is going "reverend".

Strange as it may seem "Goat"
Plott always finds a Jailors daugh
ter in all towns.

Who says Tezrcau Can't dance. He did the Carioco up and down the isle of a Greyhound bus.

It can't be that Gober is afraid his hair will change colar that he wears the cooks hat all the time is it?

Brockett believes in "Be kind to dumb animals". But Lokke isn't a dumb animal Brockett and you had better be careful around cages next time.

Can you imagine "Red Brown" on the "air". He states he will be on "that air train the 31st".

(Cont'd next Col.)

## PINE KKOTS Cont'd fromeCol. 1

Instead of carrying a chair around now Drinkard has a death grip on a thermometer.

If you look closely Joe Johnson got a finger wave and a singe this past week-end in town. Oh! You hand-some brute.

Speedro Cooper is to retire soon from tap dancing. The machine oil gave out.

Watch Tezreau going off in the dark with another boy. You'll get all wet. Especially this day boy he thinks you are a post.

Says Haircut to Tezrcau, "Give me five cents worth of Coca-Cola.

George Smith had better get him a detective to find out who it is that has been short sheeting him.

Joe Jones paid Terreau a nickel he had been owing him.

## NEWS FROM HERE . NO YONDER

New York City has a large number of wealthy persons who labor under the impression that they can success fully play bridge with professionals because many exclusive bridge clubs and bridge experts are supported in excellent style by them. In fact one professional has had little trouble in winning an average of \$2,000 a week for a number of years.

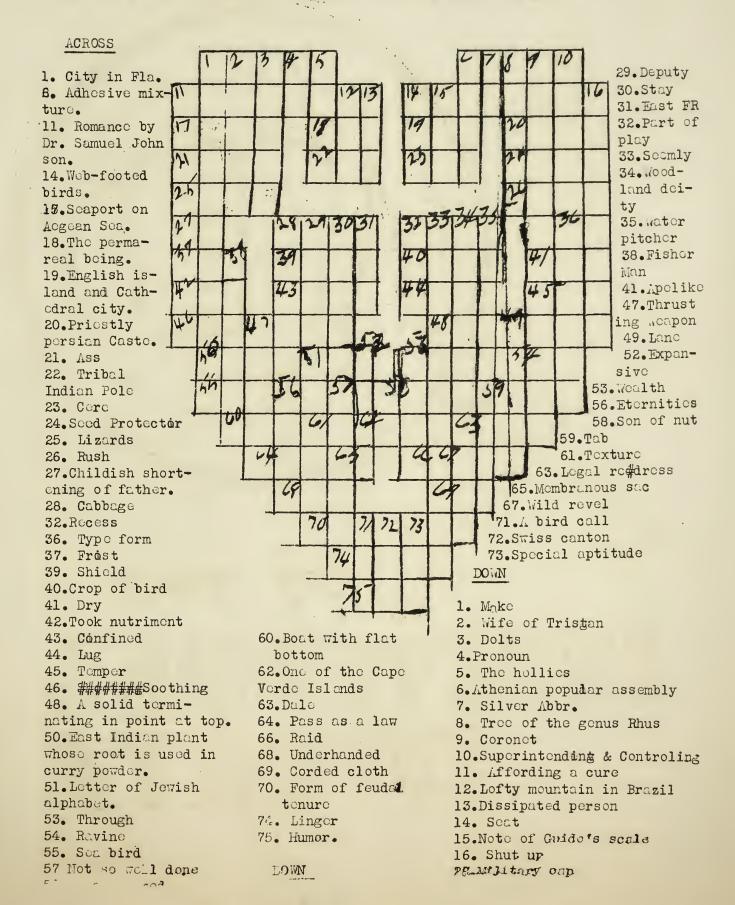

Good luck, in the form of fourleaf clover, now can be purchased in any quantity. A company in the Canal Zone, growing beautiful specimens, sells them in lots of five, carefully pressed, so they retain their natural shape and colar.

Women today constitute 95 per cent of the pearl divers in Japan, 50 per cent of the bartenders in E.gland and 17 per cent of the Cont'a next page Col. 1.
